

## Creating Success in a Distributed Agile Team

[More Info](#)

### Creating Success in a Distributed Agile Team

By Heidi Anderson, Software Tester

Agile development methodologies focus on highly collaborative team environments that are continuously planning, developing, testing, integrating and delivering functional software. In such environments, constant feedback and communication are critical and there are small margins for errors and delays. In the ideal scenario, an Agile team would be collocated to allow for face-to-face interactions between all team members, because this is historically...
